TENDEROS · DEMO RUN · 2026-10-24

Supply of 1000 MW Round-the-Clock Thermal Mimic (RTC-TM) power from ISTS-connected RE projects

RFS NO. SECI/C&P/IPP/13/0020/25-26

BIDDER (FICTIONAL)

Arkaja Renewables Private Limited

A fictional bidder for the TenderOS demo. The company, its people, figures, bank and instruments are invented; nothing here is a real bid, guarantee or financial statement.

TARIFF QUOTED	CONTRACTED	HIGHS SCENARIOS	CLICKS CHECKED
₹7.05/kWh	**200 MW**	**7**	**150 / 150**
for the target equity IRR	RTC-TM, 25 years	sized and priced	all passed

Run 2026-10-24T19:53:47+00:00 to 2026-10-24T20:09:58+00:00 against http://127.0.0.1:3000, commit eea87a4. Tender reading: rules (no model key on this server); tables by Docling; search by haystack-bm25.

The bid at a glance

Arkaja Renewables Private Limited bids **200 MW** of round-the-clock thermal-mimic power under SECI/C&P/IPP/13/0020/25-26, at **₹7.05/kWh**, from solar, wind and a battery sized by HiGHS against every peak and off-peak 15-minute block of the tender as amended (Amendment-01: 90% in the Peak Hours, 70% off-peak; Amendment-02: SCSD 24 months after the PPA).

SOLAR	WIND	BATTERY	EQUITY / PROJECT IRR
523 MWac	**293 MW**	**423 MW** 1,692 MWh	**14.0% / 10.0%**

EMD	PERFORMANCE BG	MINIMUM NET WORTH	FORMATS
₹131.31 cr	**₹328.28 cr**	**₹1,313.11 cr** bidder: ₹6,500 cr	**11 filled** each reviewed

Scenarios, sized by HiGHS in the SECI RTC tender tab

	SCENARIO	MW	PEAK PLAN	SHORTFALL	SOLAR MW	WIND MW	BATTERY MW / MWH	TARIFF ₹/KWH	EQUITY IRR %	PROJECT IRR %	SOLVE S
S2	Meet every block	200	any	hard	762	302	741 / 2,965	8.10	14.0	10.0	37
S3	Evening peak only	200	evening	penalty	424	316	292 / 1,167	6.53	14.0	10.0	55
S4	No wind	200	any	penalty	940	0	759 / 3,034	8.22	14.0	10.0	22
S5	500 MW	500	any	penalty	1,308	732	1,057 / 4,229	7.04	14.0	10.0	51
S6	50 MW	50	any	penalty	131	73	106 / 423	7.04	14.0	10.0	51
S1	**The bid**	**200**	**any**	**penalty**	**523**	**293**	**423 / 1,692**	**7.04**	**14.0**	**10.0**	**52**

The highlighted row is the bid filed in the forms. Lowest tariff: S3 Evening Peak Hours only (₹6.53/kWh). Every scenario uses the benchmark costs and financing filled by the app; the tariff is the one that gives the target equity IRR.

What the scenarios say

- **Never paying the shortfall penalty is expensive:** meeting every block costs ₹8.10/kWh, +₹1.06 (+15%) against the bid; the bid lets HiGHS weigh a short block at 1.5 × tariff against more plant.
- **Planning on the evening peak only** gives ₹6.53/kWh, −₹0.51 (−7%) against the bid, but the Buying Entity picks the 6 hours day-ahead anywhere in 18:00–10:00: a morning pick falls short and pays.
- **Without wind** the floors need more solar and storage: ₹8.22/kWh, +₹1.18 (+17%) against the bid.
- **50, 200 and 500 MW price the same:** the model's costs are per MW, so the plant scales with the bid; economies of scale, land and connectivity limits are not in it.
- Every tariff is the one that gives the 14% target equity IRR on benchmark costs; a real bid prices the bidder's own quotes.

The scenarios

S2 · Meet every block. No shortfall in any 15-minute block of any modelled year: the price of never paying the penalty.

S3 · Evening Peak Hours only. Plans the 90% floor for 18:00-24:00 only; a morning pick by the Buying Entity would fall short and pay.

S4 · Solar and battery, no wind. The same bid without wind: how much more solar and storage the floors need.

S5 · Largest bid, 500 MW. The most one bidder may offer (RfS 5.1).

S6 · Smallest bid, 50 MW. The least one bidder may offer after Amendment-01 (was 100 MW).

S1 · Bid: 200 MW, any 6 Peak Hours, pay the penalty. The bid filed in the forms: solar, wind and battery sized for whichever 6 Peak Hours are picked, a shortfall priced at 1.5 x tariff.

The tender as read: the RfS with its amendments

The five documents were uploaded together on the Tender to Bid start screen. TenderOS classified them, read the amendment and clarification schedules (Docling), applied the amendments to the RfS reading, and indexed every page for search.

The letters: every format in the RfS wording, filled

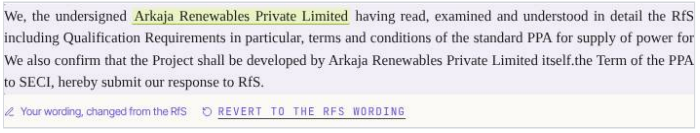

Each format this bid needs, as the full letter SECI prints in the RfS: the blanks filled from the bid and the particulars, the alternatives not chosen struck out (as the RfS asks), each paragraph editable in place. Each letter was downloaded as Word and PDF, then all of them together: `letters/SECI_RTC_TM_V_Bid_letters_Arkaja_Renewables_Private_Limited.docx` and `letters/SECI_RTC_TM_V_Bid_letters_Arkaja_Renewables_Private_Limited.pdf`.

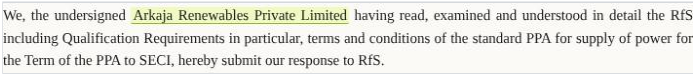

FORMAT	TITLE	WORDS	STRUCK	FILES

A change in place

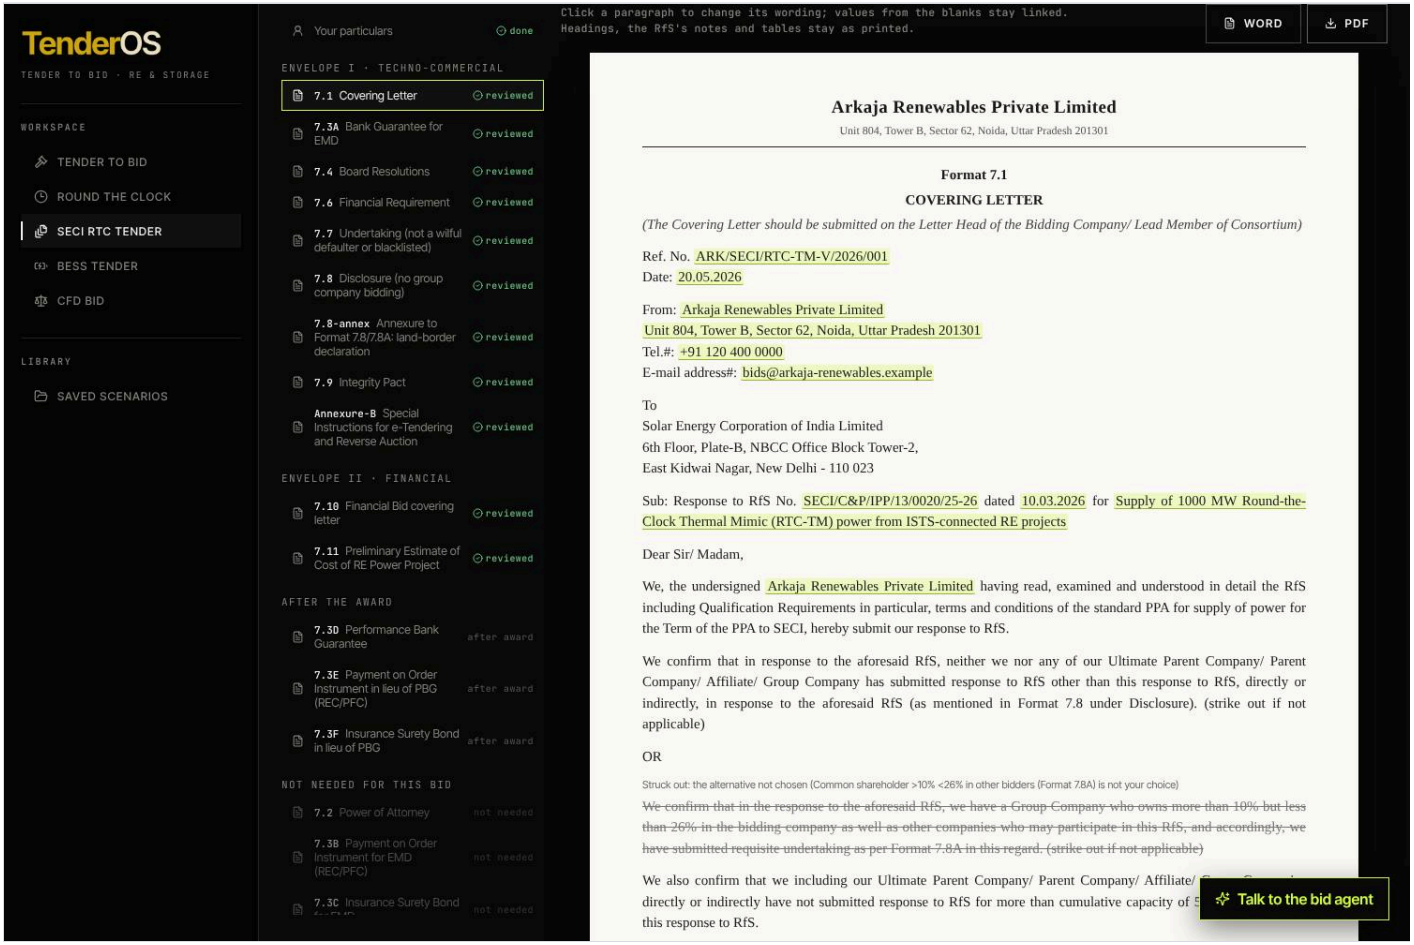

In Format 7.1, paragraph 8 was extended with: *We also confirm that the Project shall be developed by Arkaja Renewables Private Limited itself.* The paragraph was marked as the bidder's wording and the format's review asked to be redone (CHANGED SINCE REVIEW: MARK REVIEWED AGAIN); it was then reverted to the RfS wording, so the files above carry the RfS text. Saved to the scenario library: Saved “Arkaja Renewables Private Limited: SECI RTC-TM-V bid” version 1: the particulars, every format's blanks, the letters with their edits and the sizing..

The paragraph as changed (left) and reverted (right):

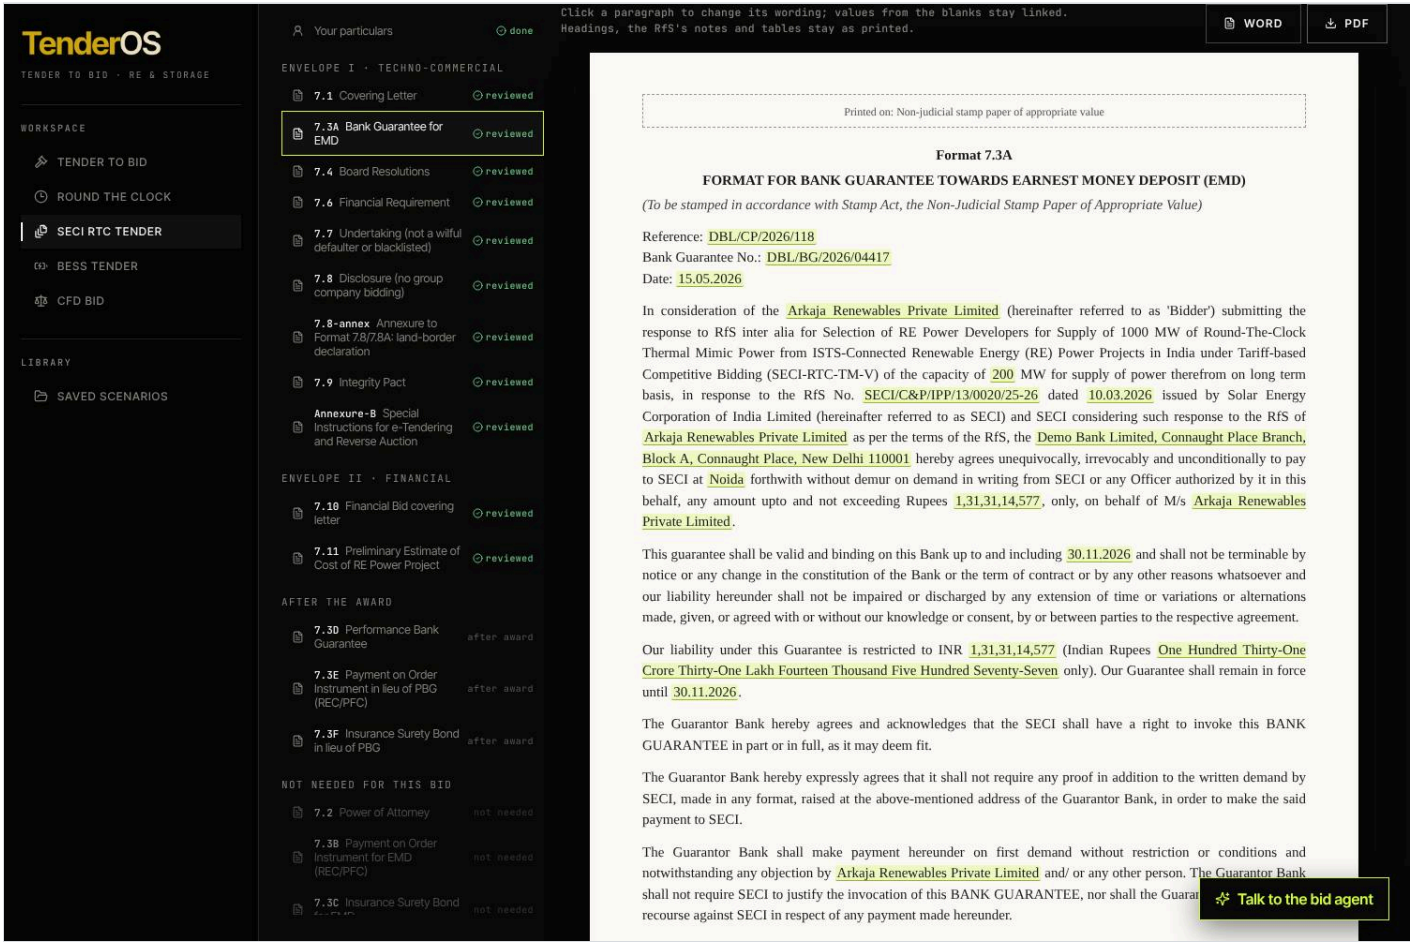

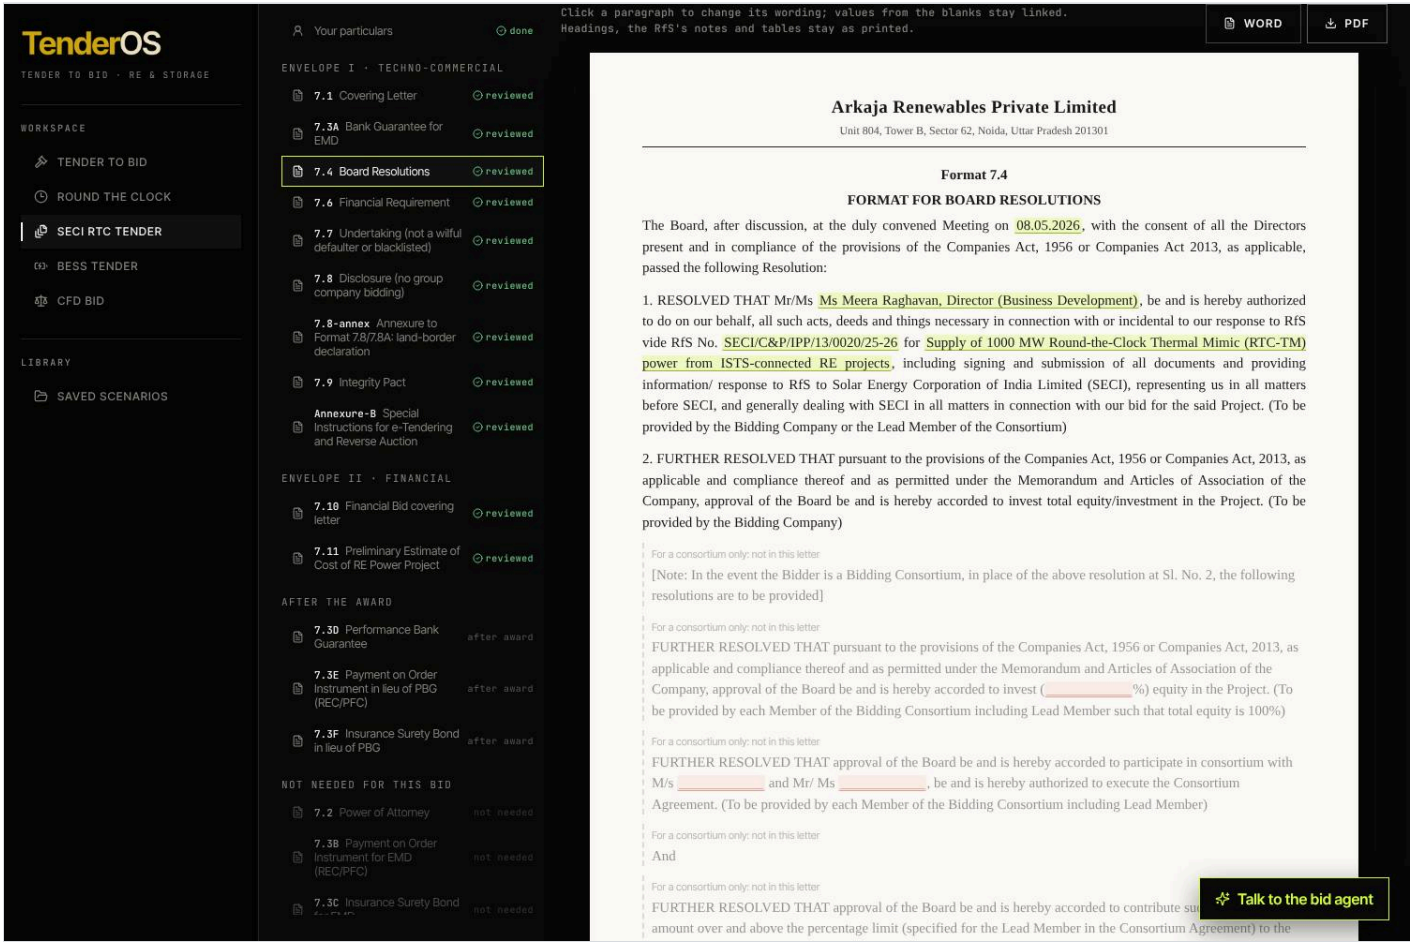

Format 7.1: Covering Letter

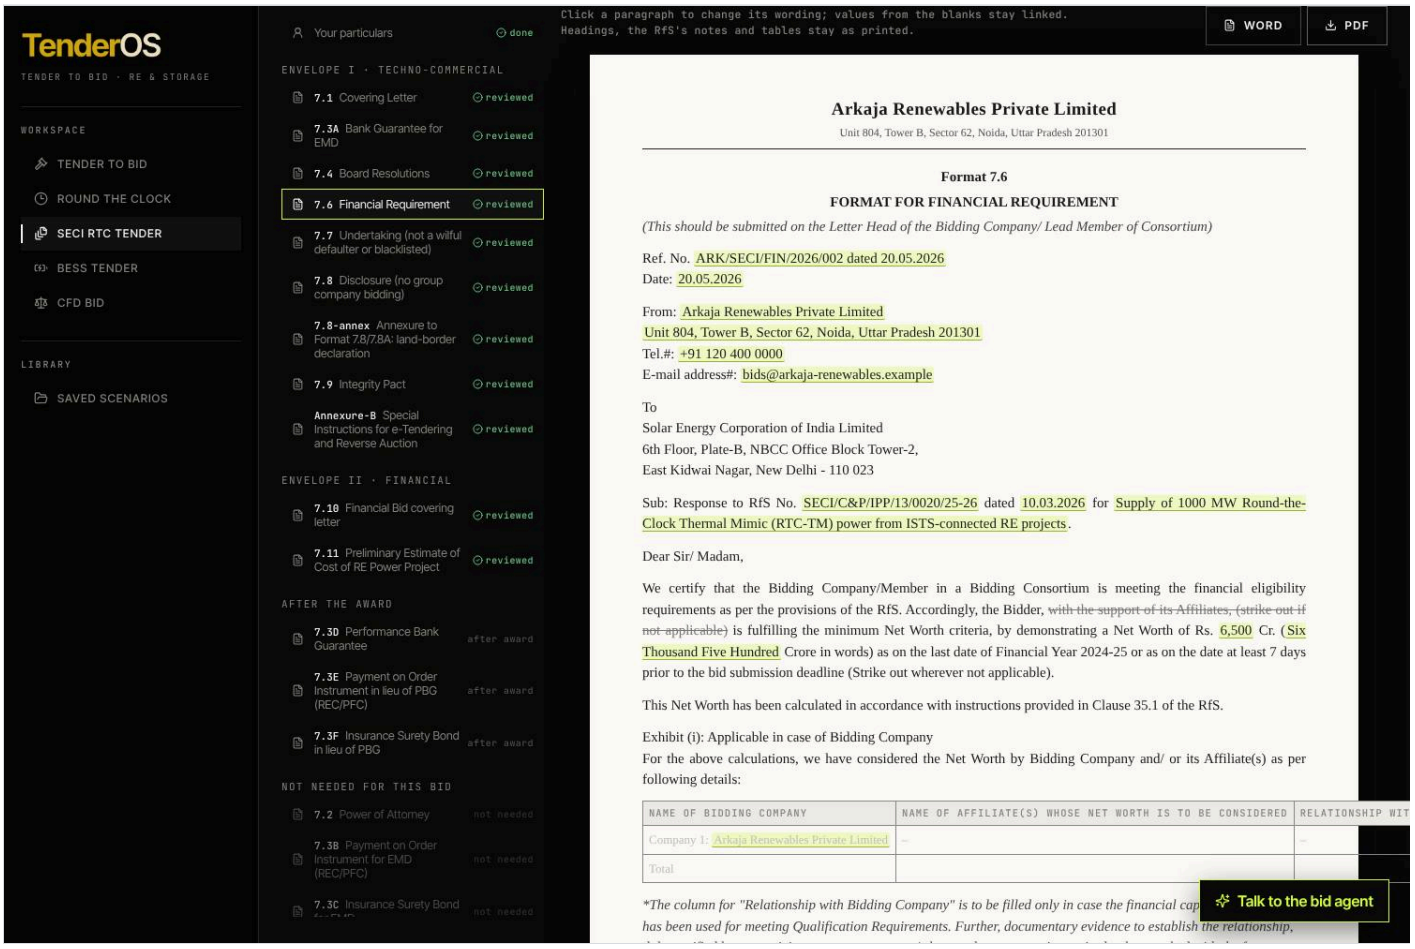

Format 7.3A: Bank Guarantee for EMD

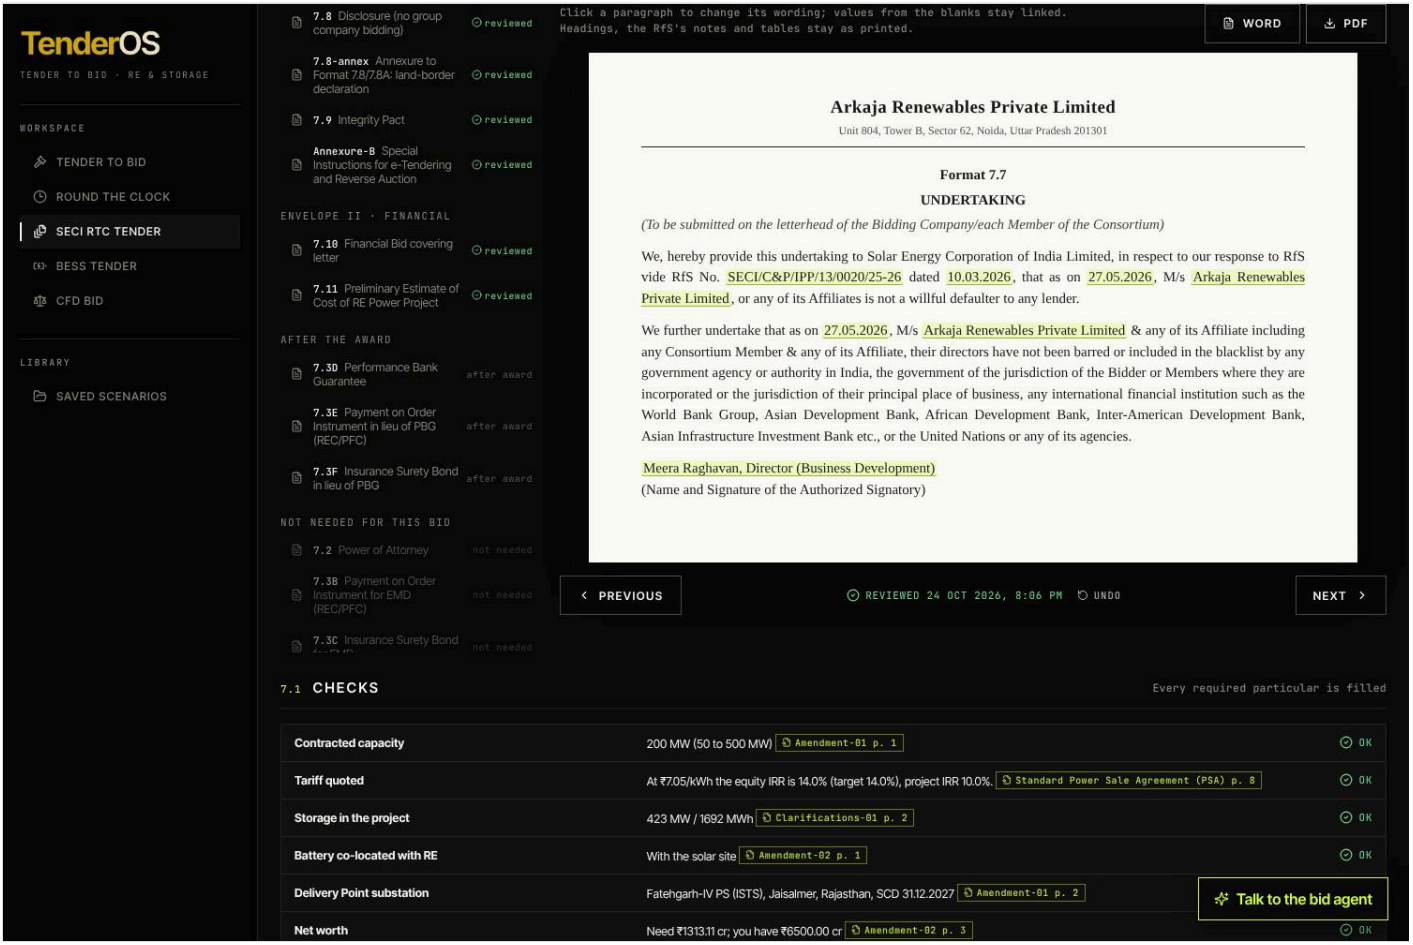

Format 7.4: Board Resolutions

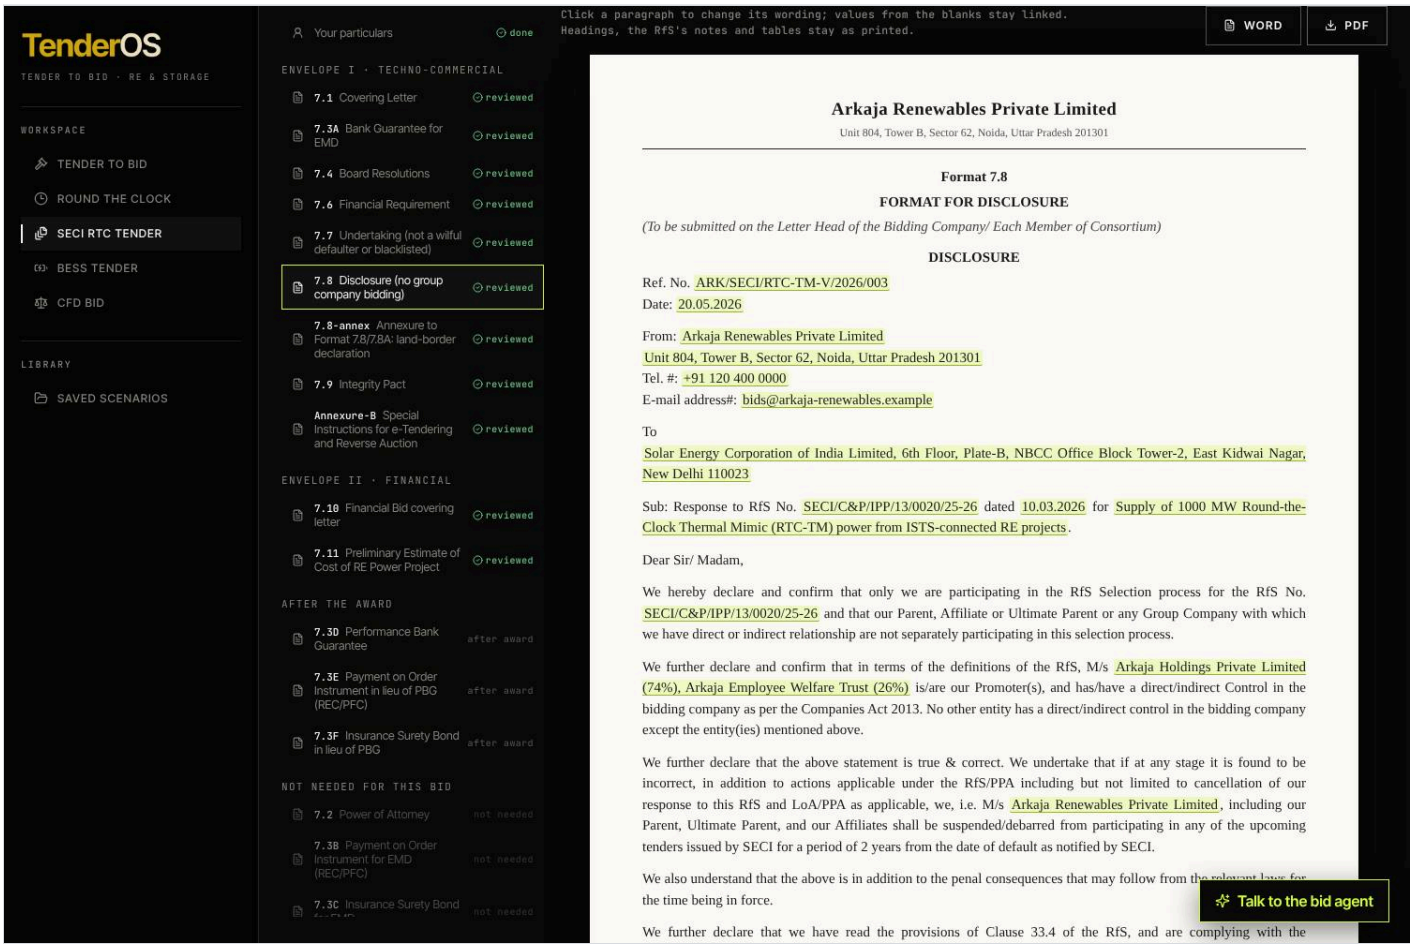

Format 7.6: Financial Requirement

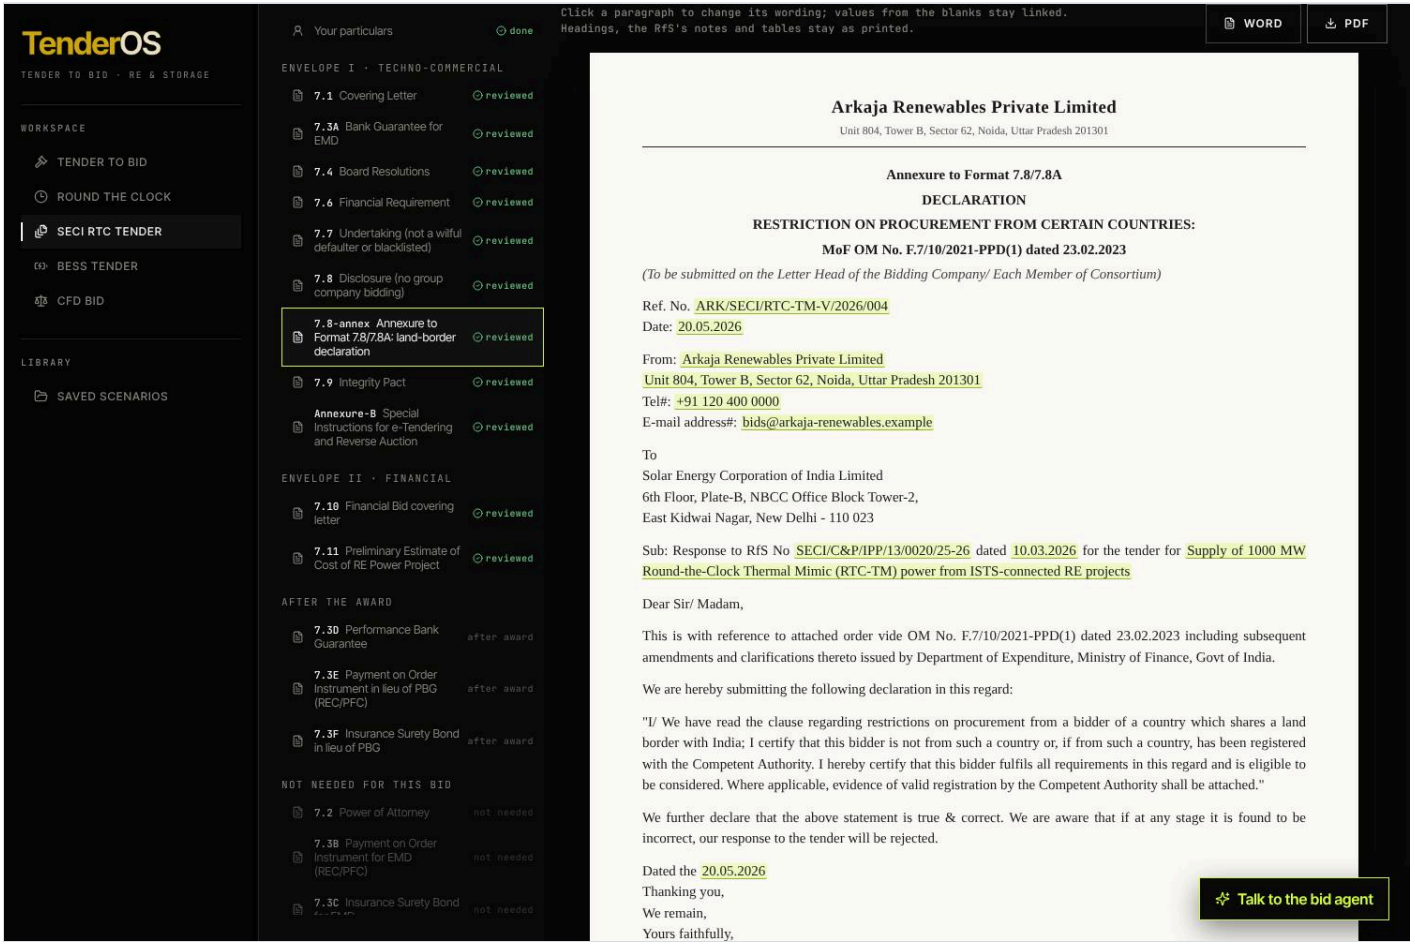

Format 7.7: Undertaking (not a wilful defaulter or blacklisted)

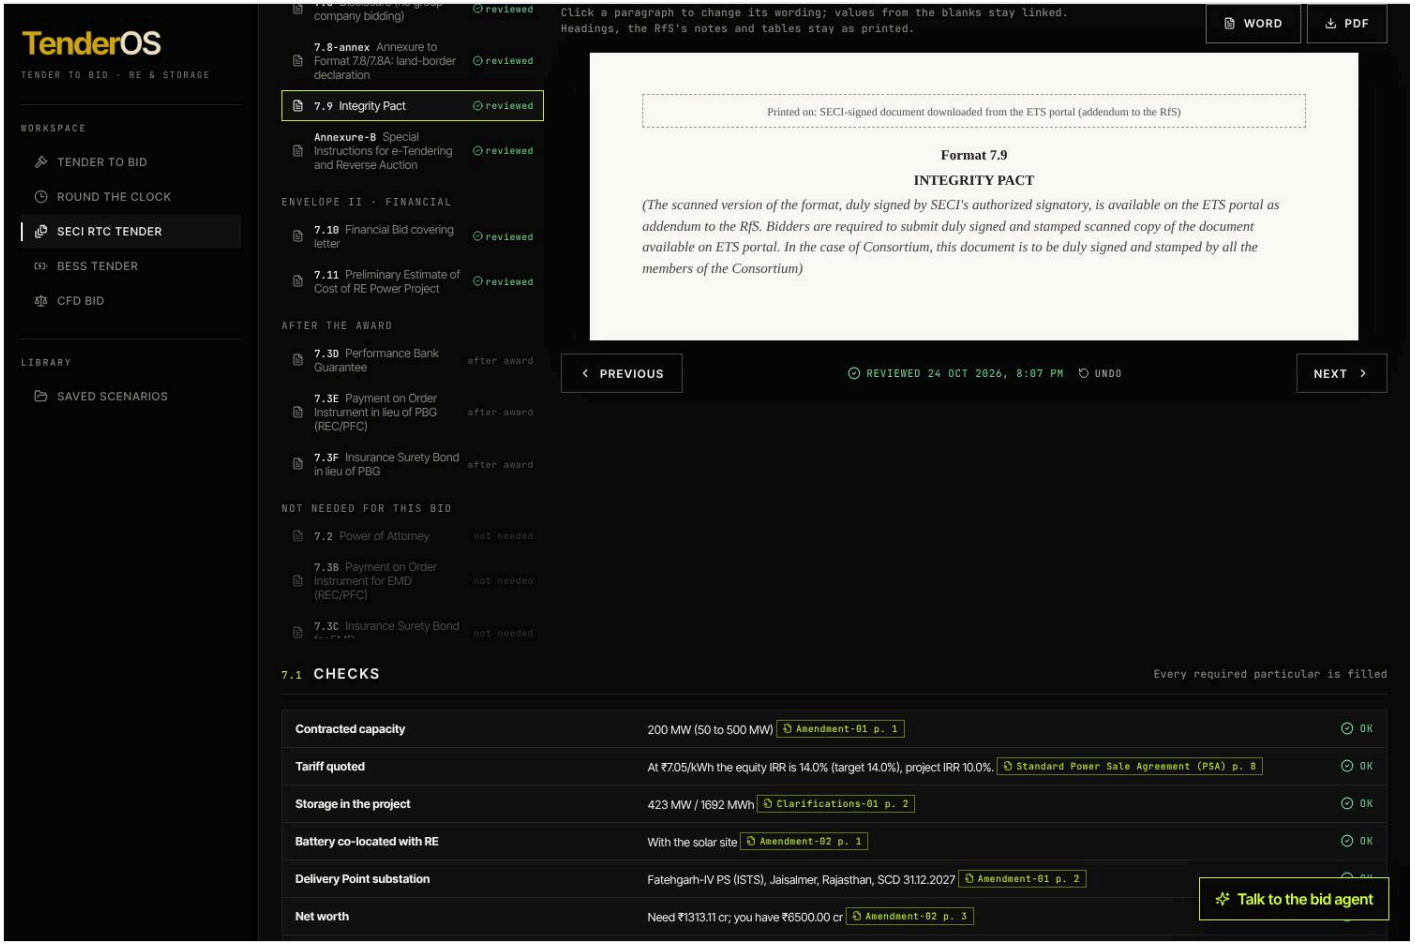

Format 7.8: Disclosure (no group company bidding)

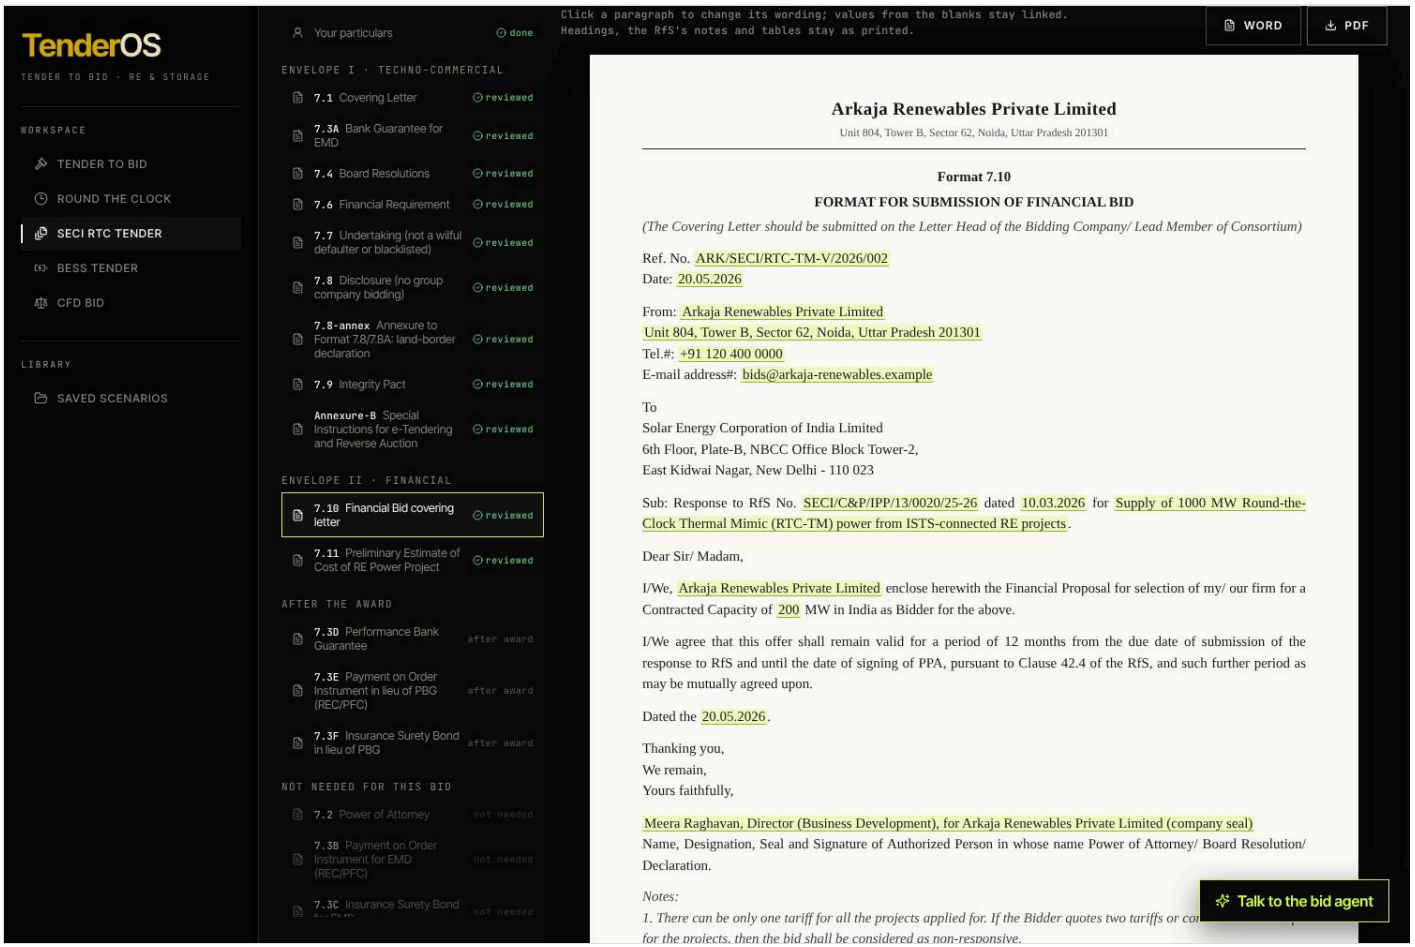

Format 7.8-annex: Annexure to Format 7.8/7.8A: land-border declaration

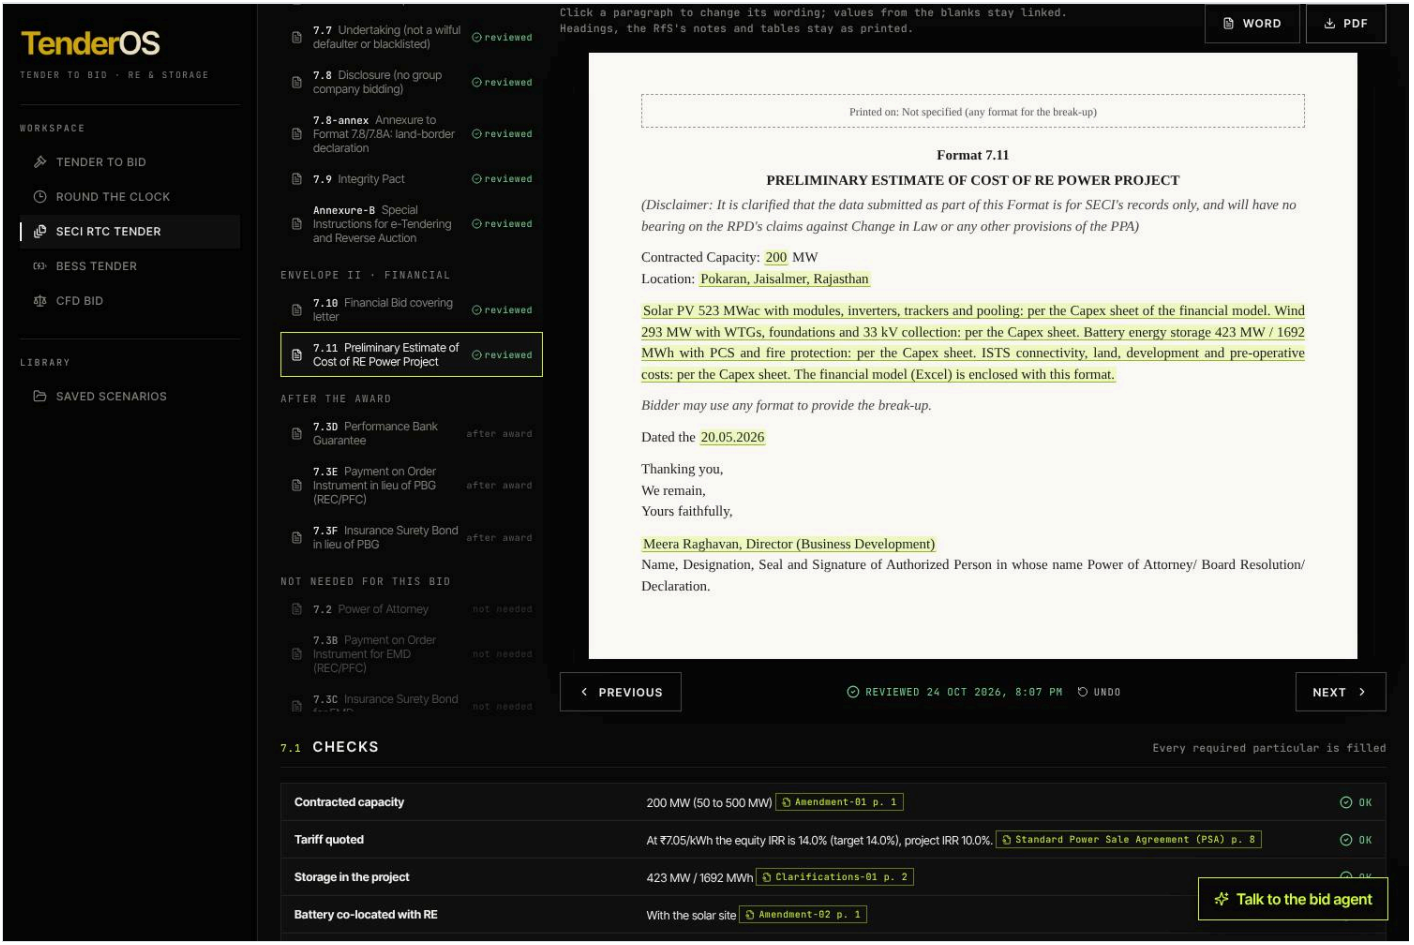

Format 7.9: Integrity Pact

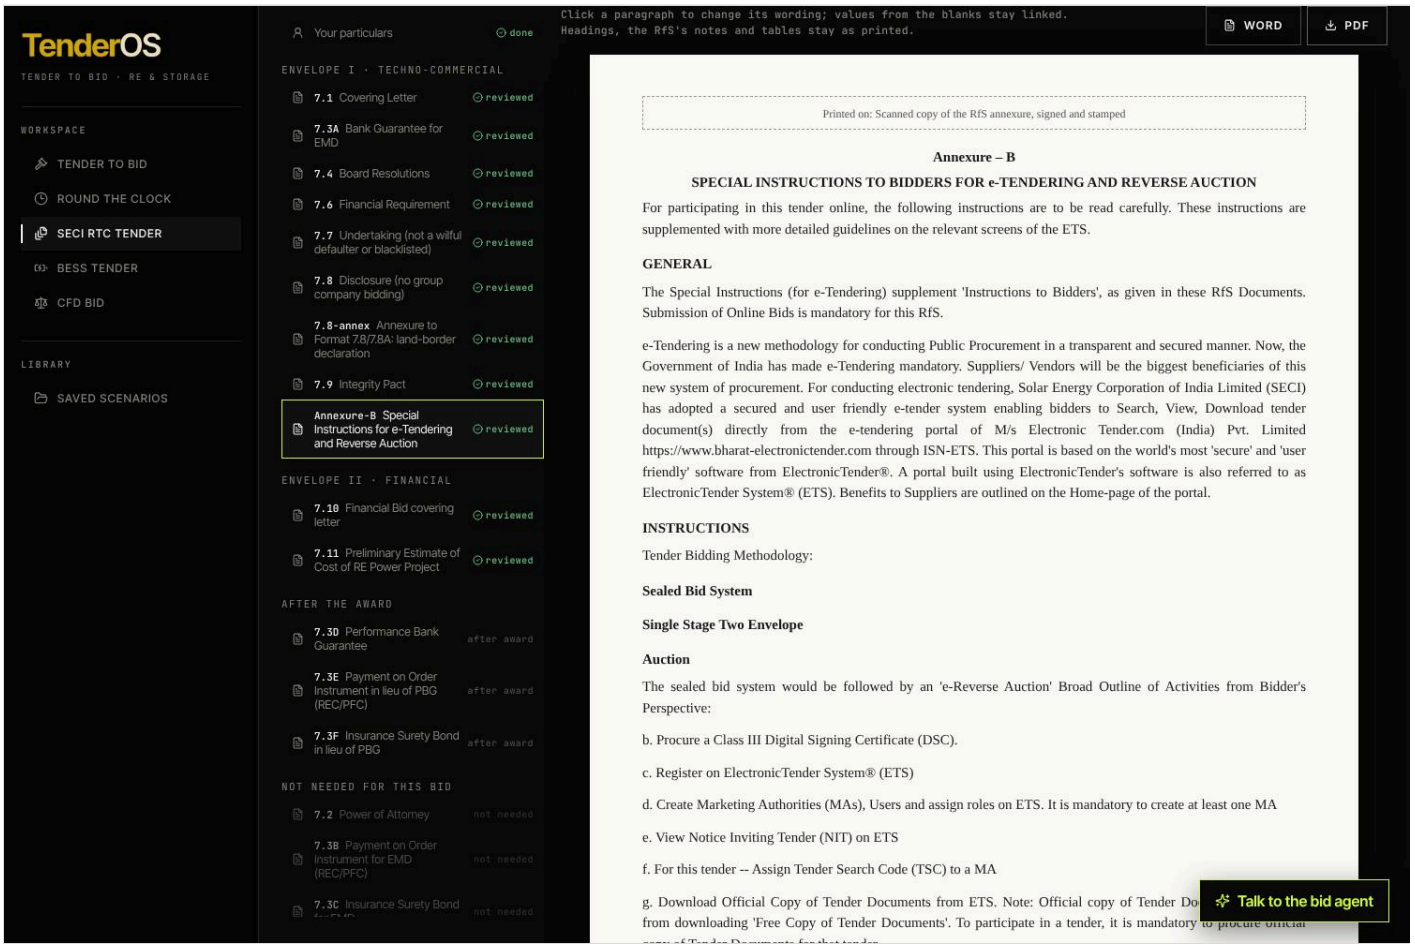

Format 7.10: Financial Bid covering letter

Format 7.11: Preliminary Estimate of Cost of RE Power Project

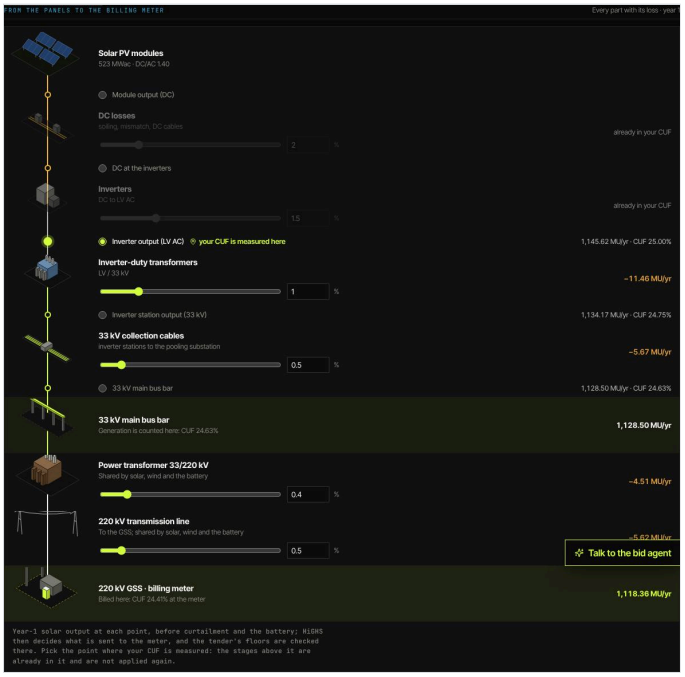

Format Annexure-B: Special Instructions for e-Tendering and Reverse Auction

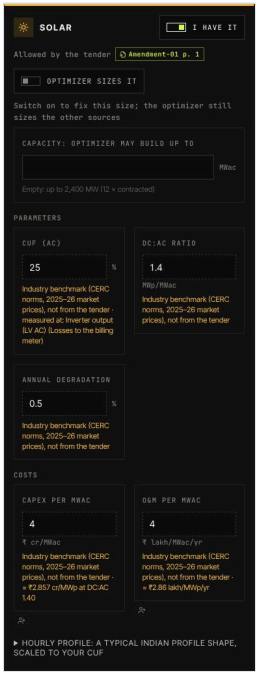

Losses to the billing meter, MWac and MWp

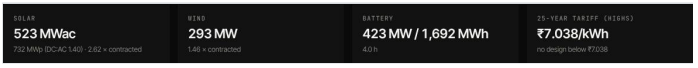

The bid is sized at the 220 kV billing meter. Each technology's losses apply from where its CUF is measured. Solar is measured at the inverter output, so its inverter-duty transformers and 33 kV cables apply. Wind is measured at the turbine terminals, so its WTG step-up transformers apply. The battery's round trip is quoted at the PCS, so its MV transformers apply both ways. The 33/220 kV transformer and the 220 kV line are shared by all three. Billed here: CUF 24.41%.

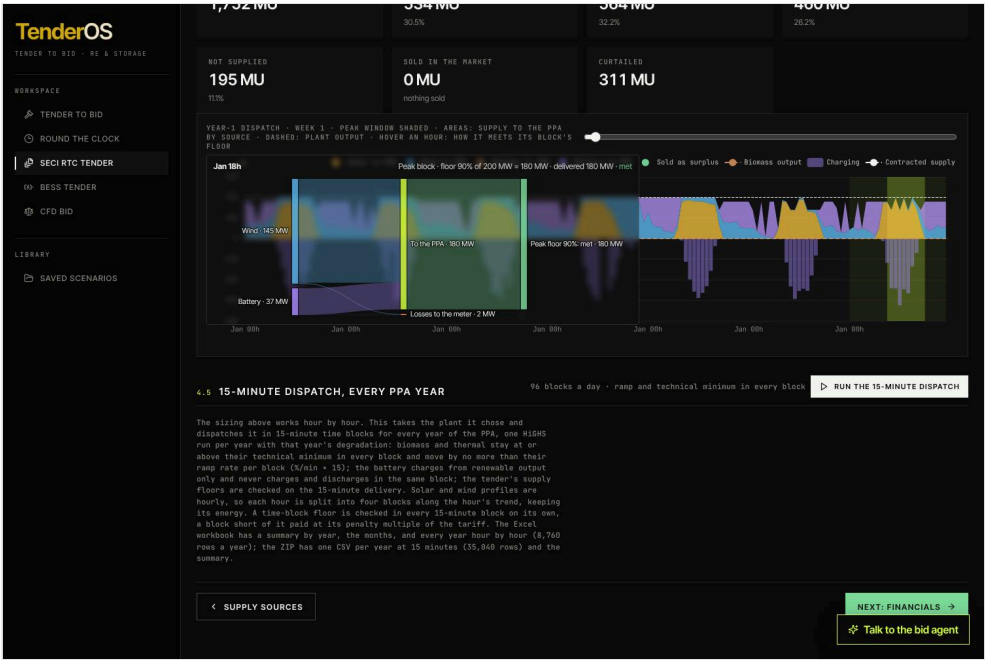

Solar capex is entered per MWac and shown per MWp (= ₹2.857 cr/MWp at DC:AC 1.40). The plant: SOLAR 523 MWac 732 MWp (DC:AC 1.40) · 2.62 × contracted WIND 293 MW 1.46 × contracted BATTERY 423 MW / 1,692 MWh 4.0 h 25-YEAR TARIFF (HIGHS) ₹7.038/kWh no design below ₹7.038

An hour of the dispatch, and every PPA year

Hovering an hour of the year-1 dispatch shows it as a see-through Sankey. It runs from the sources, through where their energy went (to the PPA, battery charging, sold, curtailed, transformer and line losses), to the block's floor: met, above it, or short.

The 25-year dispatch checks every PPA year in 15-minute blocks, with the time-block floors in every block. In 15-minute blocks the plant is short of the time-block floors in 25 of 25 years: 2,575.4 MU in all, paid at 1.5 × the tariff, as the sizing chose. Year 1: 97.3 MU short here, 96.3 MU in the hourly sizing. The penalty is on the energy short, so it is the same whether that energy falls in a few blocks or is spread over many; the 15-minute dispatch spreads it (the sizing had 86% of peak hours at the floor), which is why fewer blocks are at the floor here. The workbook `models/SECI_bid_dispatch_25_years.xlsx` has a summary by year, the months, and every year hour by hour.

YEAR	PEAK HOURS FLOOR (EVERY BLOCK) ≥ 90%	OFF-PEAK FLOOR (EVERY BLOCK) ≥ 70%	SHORTFALL	CURTAILED	SOLD
1	⊗ 53.9% of blocks	⊗ 97.7% of blocks	97.3 MU	327 MU	0 MU
2	⊗ 53.9% of blocks	⊗ 97.7% of blocks	97.7 MU	323 MU	0 MU

Talk to the bid agent

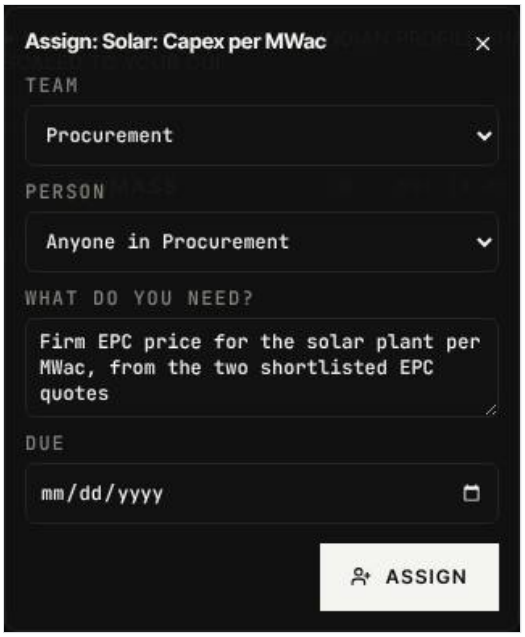

The team: assign, answer, accept

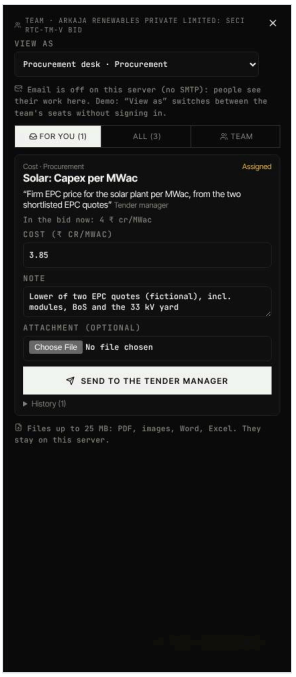

The tender manager (the super admin) assigned three things on the saved bid. The solar capex went to procurement, Format 7.1 went to finance for its signed copy, and the Peak Hours condition went to legal for a reading. Each desk answered from its own view; in a demo, "View as" switches between the desks without signing in. Each accepted answer went into the bid as a new saved version. Legal's first reading was returned with a note, answered again, and accepted.

What this run does not show

- The bidder, its people, figures, bank and instruments are invented. Nothing here is a real bid, guarantee or financial statement.
- Costs, CUFs and financing are the app's benchmarks, not quotes; the tariffs follow from them.
- Tender reading ran in rules (no model key on this server). The model reading (Claude) is not part of this run.
- The GPT-Live voice agent was not configured on this server; its panel and charts were opened by click.
- Email was off in this run (no SMTP on the test server): the team saw their work in the Team panel. The signed copy uploaded by finance is the filled letter standing in for a scan.
- The bid pack and the letters are drafts for the bidder to print on letterhead or stamp paper, sign and stamp; the EMD instrument and enclosures are the bidder's to obtain. The letters follow the RfS wording as extracted from the RfS PDF; check them against the RfS before signing.
